## Apk launcher 3

E.P. Cacombo Applications Tools Launcher3 (launcher) 1.1.5 · 王—— 27 July 2019 (1 year ago) Follow us page 2 Follow us Based on Google's AOSP project. Very clean and simple. Support gummy bears, kitkats, lollipop, marshmallows and nougat. Added some nice features. Key features:• A-Z app list, with fast scrolling and quick search for apps on your device and play store. • App suggestions bring the app you're looking for to the top of the A-Z list. • Support for the open calendar in the upper-right corner for your current location. • Improve the app search bar, you need to start searching from the first character. [Source Code] Privacy Policy Launcher &lt;3 does not collect or transfer any data to us or to any third parties. Action Launcher 3 is also a complete rewrite and full redesign. It takes everything you love about Action Launcher 2 and Google Now Launcher, and subtracts it with material design. Notable features include: • Quickdrawer, for instant access to all your apps. • Quicktheme. In true material design, the colors from your wallpapers are produced, used to customize the appearance of your layout. Quickdrawer, folder background, Google search box and more can all be themed with your wallpaper. • Covers, innovative take on folders which allows you to launch apps and shortcuts without compromising the appearance of your carefully designed home screen. • Shutters, a unique feature that unlocks the power and potential of Android widgets. Swipe over an app icon, and the widget for that app is created and displayed automatically. • Use icon packaging and change individual icons. • Full tablet support. An action launcher allows you to import from your existing deployment from other launchers such as Apex, Nova, Google Launcher, Sense, TouchWiz and the stock's Android launcher, so you feel right at home. Note: Some features require the Plus in-app upgrade. For permissions: \* Phone: Required so that all direct dial shortcuts you create can initiate a phone call. Try it for free! NOTE: Run Action 2 is now a fee-only application. Previous users are free to install it here: : 3.8M Current version : 3.1.5 requires Android : 4.1 and up offered by : Chris Lacey Create shortcuts to make your apps easier to access Set up your phone exactly how you like it A platform that provides the best gamer experience Powerful and elegant launcher A keyboard that learns with you Customize Samsung From Cable The official app for Samsung wallpapers Typing on your touch device gets easier
